7 JAN 1969

25X1A

MEMORANDUM FOR: Comptroller, National Reconnaissance Office

SUBJECT: Additional FY 1969 [redacted] Funds  
for [redacted]

25X1A

REFERENCE: Attachment II to [redacted] 9322-68 dated  
24 October 1968, Subject: Phases I  
and II Costs, [redacted]

25X1A

25X1A

1. [redacted] is a new program utilizing a Beech AQM-37A drone carried on the U-2R. It will be used in an effort to stimulate a SAM firing from the [redacted]. Phase I of this program consists of a passive drone and provides for ELINT data collection from the launching U-2R. This phase is scheduled for completion in the spring of 1969. Phase II will incorporate electronics on the drone itself, which will increase the likelihood of a beacon and fuze intercept, and improved electronics of the U-2R. A jammer will be carried on the drone as an alternate payload for determination of ECCM capabilities. All drone collected data will be telemetered to the U-2R.

25X1C

2. The ELINT required items to be developed, with estimated costs, for two complete systems are:

Drone carried jammer

25X1A

U-2 guidance receiver

Drone carried beacon and  
fuze receiver package

Improved U-2 tracking receiver

This material contains information affecting the national defense of the United States within the meaning of the espionage laws, Title 18, USC, Sections 793 and 794. Its transmission, communication or disclosure to an unauthorized person is prohibited by law.

TOP SECRET IDEALIST [redacted]

25X1A

3. The development of the electronics will be the pacing item in Phase II. Therefore, to permit an early start for this program, additional FY 1969 [redacted] funding will be required. Fabrication of a guidance intercept receiver and partial funding for development of a jammer will require [redacted]. This [redacted] was included in the reference document as Phase I costs for FY 1969 funding for Design, Engineering and Procurement of Identifiable Long Lead Time Items for Phase II ELINT package.

25X1A

25X1A

4. An additional [redacted] will be needed for completion of the system - [redacted] for the above-mentioned jammer, and [redacted] for the beacon, fuze receivers and search receiver. Total estimated time for development of the electronics is six months. This [redacted] was included in the reference document as Phase II costs for FY 1970 funding for ELINT System Development (two prototype vehicle systems). If advanced to FY 1969, this will improve the operational date of the system and also reduce the Phase II funding required in FY 1970.

25X1A

25X1A

5. In accordance with these identified requirements, it is requested that FY 1969 [redacted] approvals be increased by [redacted] and that this be applied to Category II, Procurement of Defensive Countermeasures Equipment.
